KF-234 PG2

PowerG Wireless 2-Way Keyfob

Visonic

Installation Instructions

1. INTRODUCTION

KF-234 PG2 is a miniature PowerG 4-button (6-function) keyfob, designed for use with PowerG control panels.

Transmission is initiated by pressing any one of the four recessed pushbuttons. Upon pressing a specific button, the KF-234 PG2 transmits a PowerG message associated with the button that was pressed and identifiable by PowerG control panels.

A red LED lights during transmission. When an identified command is received by the PowerG control panel, it acknowledges the command. Upon acknowledgement, the green LED lights and a happy beep is heard to indicate successful completion of the command or the red LED lights and a sad beep is heard to indicate that the control panel cannot perform the command.

In addition, a battery report is transmitted with the outgoing message. PowerG control panels are designed to identify this report and operate a corresponding output, if required.

Each keyfob is supplied with a small key ring.

Note: For UL Listed Product, Panic is for Ancillary Use only.
